2. Definitions

Definition of terms used	to describe the current state of re	epair for each item inspected

Definition of terms used	a to describe the current state of repair for each item inspected			
Requirement met:	When the Inspector has viewed the subject area and he is of the opinion that the current conditions meet the requirements of The Residential Tenancies Amendment Act 2018.			
Requirement not met:	When the Inspector has viewed the subject area and he is of the opinion that the current conditions does not meet the requirements of The Residential Tenancies Chendman Act 2015			
Observation:	When the Inspector has observed the subject area requiring maintenance to be cried out by a licenced person, trades person or a person of ability, halting further deteriors from to the property.			
Recommendation:	When the Inspector has viewed the subject area and he is of the opinion that the existing conditions does not meet current requirements of the ACC Series BCA Volume 2 2019 in matters that may pose significant risk to life and safety.			
Unable to Inspect Due to access	An area of the site where there is insufficient, unsafe or unreasonable access.			
Not Applicable (N/A):	N/A: When the subject field doesn't make up any part of the inspected property.			
Report Definition				
Shower Recesses:	Tests may be made on shown recesses to detect leeks (if water is connected). The tests may not reveal leaks or show incore it waterproofing if silicon liquid or masonry sealant has been applied prior to the inspection. Such application is temporary waterproofing measure and may last for some months before breaking down. The tests of shower recesses are limited to ranning water within the recesses and visually checking for leaks. As shower are only checked for an ort period of time, prolonged use may reveal leaks were not detected at the time using action. No evidence of a current leak during inspection does not necessarily mean that the shower does not leak.			
Glass Caution:	Claxing in some buttorng (built before 1978) may not necessarily comply with current glass salest standards \$1288. In the interests of safety, glass panes in doors and windows especially in bight traffic areas should be replaced with safety glass of have shatterproof film stalled.			
Stairs & Balustrades:	The Australian Building Code 3.9 require that covering stairs, landings and balustrades ensure the safety of all occupants and visitors to a building. Those built prior to 1996 may not comply with the current standard. You must upgrade all such items.			
Swimming Pools:	A pool is subject to a special purpose property report and is not applicable to this report.			
Rooms Below Ground Lever:	Rooms under the house or below ground level (whether they be habitable or not) may be subject to dampness and water penetration. Drains are not always installed correctly to these areas or could be blocked. It is common to have damp problems and water entry into these spaces, especially during periods of heavy rainfall and may not be evident on the day of the visual inspection. These rooms may also not have council approval. The purchaser should make their own enquiries to Council to ascertain if approval was granted.			
Owners Corporation:	If the property is covered by an Owners Corporation (Strata Title) APBI recommend that an Owners Corporation search be conducted to ascertain their financial position, the level of maintenance afforded and any other relevant information that may impact your future ownership of the property.			

3. Inspection Agreement

Requirement for inspection agreement

The inspection is carried out in accordance with AS 4349.0

Where particular requirements of other parts of the AS 4349 suite of Standards conflict with this Standard, the requirements of the individual part shall apply in the application of that part.

A report prepared in accordance with this Standard is not a certificate of compliance of the property within the requirements of any Act, regulation, ordinance, local law or by-law, or as a warranty or an insurance policy against problems developing with the building in the future.

Unless stated otherwise, this Standard assumes that the existing use of the building will continue.

An inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered into before the inspection is carried out. The inspection agreement shall be entered in the inspection of the i

The inspection scope and acceptance criteria shall be defined by the client and agreed to between the client and agreed to he purpose, scope or acceptance criteria shall be agreed to by all parties at the appropriate time.

Purpose of inspection

The client shall identify what is to be accomplished by the inspection by nominating the purpose of the inspection including any specific requirements or conditions.

Reasonable Access to the property at time of inspection?

Yes

Note:

The inspector shall inspect accessible areas included in the scope of inspection.

The inspector shall not enter or inspect areas where safe unobscucted access is notavailable. The extent of accessible areas, as defined by the presence of safe and reasonableaccess, shall be determined by the inspector, based on the conditions encountered at the time of inspection.

An elevated area is not deemed to be an accessible area unless it is within the scope of theinspection and safe and reasonable access appropriate for the method of inspection is vailable.

Reasonable access includes a prerequisite that the mirrorum clearances specified in the table below are safely available.

Dimensions for reasonable access:

- Roof Interior: 400mm x 500mm accessible from a 3.6m ladder;
- Roof exterior: 400mm x 500mm access tole; 600mm x 600mm crawl space; and accessible from a 3.6m ladder placed on the ground

Areas sprayed with chemicals shall not be inspected unless it is safe to do so.

Accessible areas shall be clude by part of the property where entry is denied to the inspector.

PLEASE NOT

- Reasonable scess the not include removing screws and bolts or any other fastenings orsealants to access covers, unless included in the score of the aspection.
- The steed area' includes the roof, roof space, crawl space deck, balcony, access way, landingfeature of a building and the like, generally elabered above the ground and not intended fornormal use by occupants.
- If, in the cinism of the inspector, restrictions on access have compromised satisfaction of the purpose of the inspection, a recomb area at ion shall be made as to the necessity to gainaccess to allow further inspection.

access limitations may include legal right of entry, locked doors, security system, pets, furniture or other obstructions. Physical access limitations may include height, narrow boundary clearance, thick vegetation, small roof or crawl space and adverse weather conditions. The report shall identify any area or item within the scope of the inspection that was not inspected and the fact that prevented inspection.

Conditions

An inspection report may be conditional upon the following:

- Prevailing weather conditions or recent occupancy and use of services that might affect observations.
- Information provided by the client or agents of the client.
- · Deliberate concealment of defects.
- Any other relevant factor limiting the inspection.

What is reported on

The inspection includes subjective appraisal by an inspector competent to assess the condition of residential buildings. It involves a subjective assessment so different inspectors or even the same inspector on a different occasion may reach diff conclusions.

The inspection comprises a visual assessment of the building to identify major defects and to form an opinion reg general condition of the property at the time of inspection.

The following areas shall be inspected where applicable:

- The interior of the building: ceilings; walls; floors; windows; doors & frames; kitchen; bathroom; W & damp
- The exterior of the building: walls (including lintels, claddings, doors & windows); timber or ste chimneys; stairs; balconies, verandas, patios, decks, suspended concrete floors, balustrades;
 The roof exterior: roof (including tiles, shingles & slates, roof sheeting, gables, flashings); skyligl frames & st
- vents, flue valleys; guttering; downpipes; eaves, fascias and barges;
- The roof space: roof covering; roof framing; sarking; party walls; insulation;
 The sub-floor space: timber floor (including supports, floor, ventilation, drainage
 The building, within 30m of the building and within the boundaries of the site: car mp); sus ended concrete floors;
- ation, detached laundry, dscaping retaining walls > 700mm ablution facilities and garden sheds; retaining walls (where supporting other str ffectiveness). high); paths & driveways; steps; fencing (general & swimming pool); surface w (drainag

Scope of inspection

The scope of the inspection covers the type, extent and limitations of the inspection. The scope shall be suitable for the defined purpose of the inspection and shall include details of the inspection process, limitations and extent of reporting in accordance with Clauses 2.3.2, 2.3.3 and 2.3.4.

- 2.3.2 Inspection process The process or processes to be undertaken by the inspector shall be identified.
 2.3.3 Limitations Limitations that are expected to be present, or that may occur, shall be identified where possible.
- 2.3.4 Extent of reporting The extent to which items are to be reported shall be nominated. The extent of reporting comprises the significant items for the particular inspection.

The scope of the Rental Minimum Standard Inspection is to conduct a general inspection of the property to determine wheth current conditions meet the Residential Tenancies Amendment Act 2018 limited to the following table:

Inspection Item	Included	Inspection Details

Electrical Safety		Testing be carried out by a Qualified Electrical Contractor.
Gas Safety		Testing to be carried out by a Qualified Gas Fitter / Plumber.

4. Terms & Conditions

APBI Terms & Conditions

- 1. iSPECT Building Inspections has prepared this report in accordance with the guidelines of Australian Standard 4349.0 2007 (Standard) which covers the minimum requirements for the visual inspection of residential buildings and based on the inspection of the property named (Inspected Property) in the administrative cover letter by the inspector named (Inspector) in the administrative building inspection report.
- 2. The Report is prepared for the sole and exclusive use of the person, persons or body named (Client) in the administrative of er letter and cannot be used or acted upon by any other party without the express permission of iSPECT Building Inspections.
- 3. The Client, having been provided with the opportunity to read these Terms and Conditions following the making of a poking for a property inspection, accepts these Terms and Conditions. The Client acknowledges that these Terms and Conditions are also available via the website: www.iSPECT.com.au and can change without notice. These Terms and Conditions take proceedings over any oral or written representations made by iSPECT Building Inspections or the Inspector, to the extent of any inconstructions.
- 4. The Report is based on the condition of the Inspected Property at the date and time of inspection while the teport's prepared with due care and diligence, the Report is based upon the prevailing conditions and the safe and reasonable access of the Inspector to the Inspected Property as outlined in the Standard.
- 5. The Report must be read carefully and in its entirety to gain a complete understanding of the indings of the inspection of the inspected Property. It will help you understand the limitations faced by an inspector and why it is not possible to guarantee that a property is completely free of defects.
- 6. The Report is not a certificate of compliance for the Inspected Property wit and the requirements of any Act, regulation, ordinance or local law or by-law. The Report does not cover enquiries of conscils or when authorities.
- 7. The Report is subjective assessment of the Inspected Property and therefore outlines the opinion of the Inspector on the general condition of the Inspected Property at the date and time of the inspection in a dation to major defects and a general impression of minor defects and safety hazards. The Report provides no grantee and is not a warranty against problems developing with the Inspected Property in the future.
- 8. The Report does not include identification of unarthorised building work or of work not compliant with building regulations. An estimate of the costs of rectification of defects that required in accordance with the Standard.
- 9. The inspection is undertaken, and the Report prepared, by the inspector on the assumption that the existing use of the Inspected Property will continue. As such, the Inspector will not assess the fitness of the Inspected Property for any other intended purpose. We advise you to wrify any proposed shange in use of the Inspected Property with the relevant authorities.
- 10. This Report is based on a witnessessment of the inspected Property together with relevant features of the Inspected Property within 30m of the building and within the boundaries of the site, the prevailing structural, soil and weather conditions at the date and time of the inspection and the Inspector having safe and reasonable access to all areas. Where the Inspected Property is a unit or apartment, associated areas may include common areas pertinent and immediately adjacent to the Inspected Property, do a specifically instructed by the Client. Areas not inspected are noted in the Report.

and reasonable access" shall be determined by the inspector at the time of the inspection, red at the time of inspection. An inspector shall only inspect areas where safe, unobstructed The Standard rovides t ions enc based on th the minimum clearances are available or, where these clearances are not available, areas within the access is provi inspector's unob of sight and close enough to enable reasonable appraisal.Minimum clearances are defined as at nd horizontal clearance for roof space and sub floor area access. The interior and exterior roof must be m vertica leas Itre high ladder for reasonable access to be available. Reasonable access does not include removing acce cess covers. Nor does reasonable access include cutting or making access traps, or moving furniture or screw nd b stored

- Report is not a rigorous assessment of all building elements and does not cover all maintenance items. This Report also does not cover defects in inaccessible areas, defects that are not reasonably visible, defects that may only be apparent in certain weather conditions or defects that have not yet arisen due to prolonged periods of wet or dry weather or other subsequent events.
- 12. As the Report only covers the visual aspects of the Inspected Property, it does not cover any part of the building located beneath the ground surface.
- 13. The Inspector can only make comment with regard to the general, visible condition of electrical wiring and plumbing. We suggest that a licensed tradesperson be contacted for a separate report.
- 14. The Inspected Property shall be compared with a building that was constructed in accordance with the generally accepted

practice at the time of construction and which has been maintained such that there has been no significant loss of strength and serviceability.

- 15. The Report does not identify the presence of pests, or any damage caused by pests (e.g. termites, borers, etc.). We suggest that a professional pest inspector be contacted for a separate report.
- 16. No assessment or identification is made of asbestos or asbestos related products, toxic mould or other harmful substances. Asbestos dust is a hazardous material and should not be disturbed. It is vital that asbestos is not sawn, sanded, drilled or water blasted, etc. For more information about the handling and disposing of asbestos contact your local council.
- 17. Our inspection does not assess the operation of appliances, alarms, security and communication systems, smoke detactors heating and cooling systems, blinds (internal and external), soft furnishings, telephones, spa and pool equipment, building automation, electrically operated doors, plant and equipment. Any item not specifically noted in this Report is excluded from the inspection of the Inspected Property. We suggest that a licensed tradesperson be contacted for a separate report in respect of gas or electrical appliance and fittings.
- 18. No item of furniture or fixtures will be removed, moved or modified during the inspection and items and conditions covered by such furnishings and fixtures are not inspected or considered. Nor do we assess the condition of conspicuous, non-structural items such as carpets, vinyl floor coverings etc.
- 19. Any maintenance and general advice items are intended as a helpful guide. The Report is not necessarily an el faustive list of all maintenance and advice items.
- 20. You should address legal and conveyancing matters such as title and ownership to our soft after or legal representative. Compliance issues in relation to the positioning of services, privacy, vehicle access, the string of the buildings, zoning, permit or town planning issues or other legal matters should be directed to the relevant adthority or to a solicitor or legal representative.
- 21. Acceptance of this report and payment by the Client acknowledges acceptance of the Inspection Agreement and Terms & Conditions.
